This Annual Subject Index, published in three volumes, consolidates references to abstract records published in 12 monthly issues of *Psychological Abstracts* from January 2002 through December 2002. A companion work, the Annual Author Index, references these records by author and abstract number.

Index terms, selected from the *Thesaurus of Psychological Index Terms,* represent the literature covered for the periods indicated. Only terms assigned as major terms, reflecting the main focus of the article, appear in the printed subject index. (Terms assigned as minor do not appear in print but are available for online searching.) Subject matter content determines the specific terms used and, thus, not every thesaurus term will appear in every index. "See" and "See Also" references are present to direct the user to the preferred terminology or related areas of interest. Index phrases are alphabetically arranged under the appropriate index terms and represent a concise statement of the article's content or, when appropriate, identify the independent and dependent variables described in the material as well as the subject population. Style changes such as the increased use of abbreviations or the elimination of some hyphens may result in some inconsistencies and may affect the alphabetical order of phrases.
